

The Bearded Collie Breed Liaison Committee

Bearded Collie Annual Health Survey 2018

In order to collect ongoing health data on as many Bearded Collies in the UK as possible we are running an annual health survey which will be open in February each year. This is for all Kennel Club registered Bearded Collies regardless of whether they are show dogs, breeding dogs, activity dogs or pets. Please submit information on **ALL** your Bearded Collies - we need to know about the healthy dogs as well! This survey is really short and easy to complete (about 2 minutes) and is totally anonymous. It is aimed at getting everyone together to safeguard the future of our breed. We will publish the results for all to access on the clubs web sites later this year. Please click on the link below to take part:

https://docs.google.com/forms/d/e/1FAIpQLSc_Fe1jf5V1yv_YlsvsysTc76lmi81ydvPks01hpLpyivoNyQ/viewform?usp=sf_link

This is also a good time to remind people to contribute to the DNA data bank for future research and also so update health details of any animal you have in the databank at canine.genetics@aht.org.uk
Also you can enter health data on Beacon by following the link below:
